作文 号:215142 作文题目: How I Finance My College Education
学生姓名: 彭海圆 得 分: 98

As is known to all, the past decade has witness the changes of the tuition in college. How to finance our college education has become a significant problem. Here, I will show you several ways to finance the college education.

Foremost, it's extremely common that the majority count on our parents, who will pay for our tuition and fees and other expense. And then, the scholarship can help a lot. The person, who studies hard in compulsory or optional subjects and get highest scores in the examination, will be easier to win the scholarship. Finally, others, in a poor family, can apply for the education loans to further their studies.

From my standpoint, the second one is more appropriate for me. There are two critical factors accounting for it. One is that it can alleviate my parents' burden. Another is that I can put more focus on my studies. Besides, the scholarship can prove my competence, which will be beneficial to my future career.
